ABSTRACT

During Fall 1977, a questionnaire was mailed to 8,455 first-year graduates of 26 Texas community colleges. Responses were received from 4,838 graduates (57%). Following a section presenting survey highlights in 25 graphs, the survey report presents aggregate statewide questionnaire responses expressed as numbers and percentages. Respondents are categorized by college major, degree received (Associate of Arts or Associate in Applied Science), sex, and ethnic group. Responses are also summarized for questions relating to educational goals; employment status; ratings of instruction, student services, and training; problems encountered in transferring credits; relation of employment to courses completed and reasons for employment not being related to courses; course assistance in occupational area; average monthly salaries; prior employment in occupational area; and job availability. Survey results are formatted so that individual college results can be filled in and compared with statewide figures. Blank report format pages, on which institutions can record data by categories not covered in the report, and the survey instrument are included in the study report. (JP)

Preface

This monograph is a part of a series of publications designed to disseminate data produced by the Texas Student Follow-up Information System (Tex-SIS). The system, designed by Tarrant County Junior College, Fort Worth, Texas, is currently in use on a statewide basis among the community and technical colleges in Texas. A total of fourteen different Tex-SIS questionnaires are available for utilization by the colleges on a discretionary basis. These questionnaires, in addition to system implementation procedures, are contained within three Tex-SIS Follow-up Manuals, which are being used by the colleges to conduct their surveys. These Manuals were distributed statewide in August of 1976.

Since individual Tex-SIS surveys are conducted on a local basis with many of the colleges utilizing the same questionnaire, comparisons of "local" data with "state" data are facilitated. For this reason, the report formats contained within this monograph have been specifically designed to allow such comparisons to be made. Colleges are encouraged to enter their own individual data in the appropriate locations on the data pages and then reproduce the information for local dissemination. A set of blank report format pages found toward the end of this monograph can be used to report data by categories other than those included in this document (i.e., individual program areas, special populations, etc.). A copy of the questionnaire used for the 1976-77 First Year Graduate studies can also be found toward the end of this monograph.

The First Year Graduate surveys were, in many cases, conducted using three mailouts with the first mailout consisting of a transmittal letter, questionnaire, and postage-paid return envelope, while the second mailout consisted of a postcard reminder only. The third mailout, in many cases, was a repeat of the technique utilized in the first mailout. Twenty-six individual colleges were involved in the statewide composite of First Year Graduate data. Both occupational/technical and university transfer/academic graduates were included in most of the surveys. After the surveys were completed, the Tex-SIS Support Services monitored, keypunched, processed, and returned (with the data analysis printouts) the questionnaires to the college for local interpretation. At the appropriate time, all of the selected studies were loaded for a "state" composite analysis, thereby producing the data included in the monograph.

A total of 4,838 First Year Graduate questionnaires were processed from surveys conducted during the Fall semester of 1977 and used in this monograph. It should be understood that the data represents a large amount of effort provided on a volunteer basis by liaison personnel in the twenty-six involved colleges. Because the data produced as a part of the Tex-SIS Follow-up system is treated in a confidential manner, the names of these individuals and their participating colleges are not provided.

The number of colleges, categorized by initial population, number of responses, and response rate, can be found below:

Documents based on data generated by the Tex-SIS Follow-up System are furnished to participating institutions and other interested parties. These documents may take the form of Tex-SIS "One-Liners," "Program Booklets," "Monographs," and other special documents which may be useful. The Editorial Review Subcommittee of the Tex-SIS Follow-up Users Committee has the responsibility of making applicable decisions relating to what documents are produced, the content of these documents, dissemination procedures, and other considerations relating to these documents.

For purposes of providing assistance in using and interpreting Tex-SIS Monograph 9 "First Year Graduate - Data Summary - 1976-77," this document has been classified as a "Category III" document. Other categories (Category I and Category II) display information of a more generalizable nature for comparison of local institutional and statewide composite information.

A Category III document is a special, limited purpose document. A Category III document is provided to the institutions in the interest of returning to institutions simple summary information. Category III documents may not be safely used for any generalization purposes.

Note: Due to rounding, the sum of the percentage tables in this document may not be 100%.
